

PuR MetaData Analyze & Purify

With PuR MetaData, organizations can mitigate the risk of unwanted metadata leaving the workplace quickly and easily.

Leading Metadata Solution

PuR MetaData, the leading solution for metadata extraction, removes hidden information from attachments to protect your sensitive information. Ideal for several users, yet scalable enough for thousands, PuR automates the metadata removal process quickly and easily. With seamless integration for Outlook and features, such as centralized administration, Metadata Analysis, Global and Personal Option Sets, PuR simplifies the deployment and management process.

Intuitive Interface

PuR MetaData analyzes and cleans hidden information from Word, Excel, PowerPoint, and PDF attachments. Our intuitive interface helps you work more efficiently by

increasing productivity and business continuity. Minimal training and support are needed. PuR integrates directly with Outlook on the desktop. All metadata removal takes place on the individual workstations where individual emails attachments are prepared and sent. PuR has the capability to analyze and remove metadata from both internal and external emails. Additionally, we offer the ability to review the cleaned email through the PuR Attachment Wizard.

Centralized Administration Console

Our solution helps you manage the metadata process and ongoing metadata administration with ease through our centralized administration console. Through this unique interface, user

configurations

(settings) are centrally managed and distributed to the PuR application on the desktop. The PuR administration console enables you to centrally configure deployment settings and enforce consistent security policies easily through the entire network. When the PuR MetaData Client and Admin Console are combined, organizations have the perfect combination of enterprise consistency with individual flexibility.

Protect Information

With PuR, you can decrease liability and avoid costly lawsuits by protecting your organization's privacy – comprising information. Furthermore, PuR's platform enables you to increase efficiency and productivity. Metadata is simple, reliable, and cost effective.
